

# "Bringing learning out of the classroom. Students Swap Stuff as a living laboratory"

"Students Swap Stuff" project (SSS) will be analysed as a learning laboratory at KU Leuven: what did the involved students and other actors learn from the project that might help them to contribute to more sustainable production and consumption alternatives? Designing and starting a swapping system was the goal of the students of the Masters Program Environmental Health and Safety Management. The project was part of the courses Corporate Social Responsibility and Qualitative Research Methods. Youngsters nowadays are confronted with a world challenges by many wicked problems that seriously will influence their way of living.

*You will learn from a movie, created by the students about the swapping activity. There will be room for collaborative thinking.*

INGRID MOLDEREZ  
PROFESSOR AT KU LEUVEN  
**BELGIUM**

Ingrid is a passionate lecturer in the field of CSR. She likes to perceive the university as a learning laboratory to experiment with non-traditional ways of teaching and to share it with the academic world. She is inspired by Magritte's painting 'Les Jours Gigantesques', Picasso's 'Bull's head' and action-oriented learning.

**Brings along: Marc Craps, professor and researcher at KU Leuven**
